

bmobile introduces SaaS with the country's first and only locally developed application for digital tendering

The bmobile service portfolio includes SaaS (Software as a Service); this being a software distribution model in which a third-party provider hosts applications and makes them available to customers via the Internet or private links.

bmobile introduces SaaS with the country's first and only locally developed application for digital tendering.

e-Tender is an ICT driven innovative tool revolutionizing:

- Procurement Management
- Strategic Sourcing
- Selling (bid auctioning)
- Distributing and receiving RFP bids electronically
- Fully secure, successfully tested by Price Waterhouse Cooper
- Online marketplace
 - Currently over 3,800 vendors participating from over 100 countries worldwide, over 700 Tenders issued to date with 2,000+ bid uploads

The innovation and development doesn't stop there. In 2017, bmobile will launch:

- e-Document Management
- e-Tender Evaluation
- e-Contract Management portals
- Mobile Application

...all meeting the requirements of the recently established GORTT Public Procurement and Disposal of Public Property Act.

CUSTOMER BENEFITS

- Secure Online Payment and Receipt of RFPs
- Dashboard Reporting & Analytics
- Reduced costs of Tender Ads
- Software as a Service (bmobile hosts the application and data in a secure environment)
- Back-up (All the data is backed up automatically off-site)

SERVICE BENEFITS

• Time

Reduced processing time...online purchase of tenders, no need to drive to a location to submit Tenders and all questions responded to in real time with visibility to ALL Bidders.

• Sustainability

Promotes a 'green' paperless environment...no need for printed RFQ documents, in line with the company's Corporate Social Responsibility (CSR) mandate.

• Audit

Improved record keeping with digital aggregation and storage of tenders from cradle to grave...time locks, digital encryption of passwords etc.

• Transparency

Improved visibility eliminating geographic disadvantages — whether its Tobago, wider Caribbean or USA, UK or China bidders across the globe have the same access in real time.

• Cost Reductions

Reduced advertising costs in traditional media (TV, Print) by redirecting potential bidders to ONLINE postings of Tenders with worldwide visibility.

• Revenue Generation

Created opportunities for advertising on a high traffic website, with participants from over 100 countries accessing the website from 2012 to present.
